

4.2. IPv6 Reachability	90
4.2.1. Stub Router Behavior	91
4.2.2. Matter Node Behavior	91
4.3. Discovery	92
4.3.1. Commissionable Node Discovery	94
4.3.2. Operational Discovery	110
4.3.3. Commissioner Discovery	114
4.3.4. Common TXT Key/Value Pairs	117
4.4. Message Frame Format	119
4.4.1. Message Header Field Descriptions	121
4.4.2. Message Footer Field Descriptions	124
4.4.3. Protocol Header Field Descriptions	124
4.4.4. Message Size Requirements	126
4.5. Message Framing Over Stream-Oriented Transports	126
4.5.1. Message Length (16/32 bits)	127
4.6. Message Counters	127
4.6.1. Message Counter Types	127
4.6.2. Secure Session Message Counters	129
4.6.3. Check-In Counter	129
4.6.4. Message Counters as Encryption Nonces	130
4.6.5. Replay Prevention and Duplicate Message Detection	130
4.6.6. Counter Processing of Outgoing Messages	133
4.6.7. Counter Processing of Incoming Messages	134
4.7. Message Processing	135
4.7.1. Message Transmission	135
4.7.2. Message Reception	135
4.8. Message Security	136
4.8.1. Data confidentiality and integrity with data origin authentication parameters	136
4.8.2. Security Processing of Outgoing Messages	137
4.8.3. Security Processing of Incoming Messages	140
4.9. Message Privacy	141
4.9.1. Privacy Key	141
4.9.2. Privacy Nonce	141
4.9.3. Privacy Processing of Outgoing Messages	142
4.9.4. Privacy Processing of Incoming Messages	143
4.10. Message Exchanges	143
4.10.1. Exchange Role	143
4.10.2. Exchange ID	144
4.10.3. Exchange Context	144
4.10.4. Exchange Message Dispatch	144
4.10.5. Exchange Message Processing	145
