

Acronym	Definition
CSR	Certificate Signing Request
CTR	Counter Mode (AES block cipher mode) (from NIST 800-38A)
DAC	Device Attestation Certificate
DER	Distinguished Encoding Rule (from X.690)
DN	Distinguished Name (from X.520)
DNS	Domain Name System
DNS-SD	DNS Based Service Discovery (from RFC 6763)
DRBG	Deterministic Random Bit Generator (from NIST 800-90A)
ECC	Elliptic Curve Cryptography (from SEC 1) (also "Error Correction Code")
ECDHE	Elliptic Curve Ephemeral Diffie-Hellman (from SEC 1)
ECDSA	Elliptic Curve Digital Signature Algorithm (from SEC 1)
ESS	Extended Service Set (from IEEE 802.11-2020)
EUI	Extended Unique Identifier
EUI-64	64-bit EUI
GATT	Bluetooth Generic Attribute Profile
GID	Group Identifier (also referred to as "Group ID")
GKH	Group Key Hash
GUA	Global Unicast Address
HMAC	Keyed-Hash Message Authentication Code (from FIPS 198-1)
ICD	Intermittently Connected Device
ID	Identifier
IP	Internet Protocol
IPK	Identity Protection Key (a Universal Group key shared across a Fabric)
KDF	Key Derivation Function (from RFC 5869)
KDM	Key Derivation Method (from RFC 5869)
LLA	Link local address
LLN	Low power and Lossy Network
MAC	Medium Access Control (or "Message Authentication Code")
MCSP	Message Counter Synchronization Protocol
MIC	Message Integrity Code (used as synonym for MAC (Message Authentication Code) to avoid confusion with MAC (Medium Access Control) as used in network addressing contexts)
