

```

Subjects: [ 0x0000_0000_0000_0001 ],
Targets: [ { Endpoint: 1 }, { Endpoint: 3, Cluster: 0x0000_0202 }, { Cluster:
0x0000_0101 } ]
}
]
}

```

An Administrator adds an Access Control Entry which grants **Operate** privilege, for all endpoints containing the extended color light device (0x010D) on the entire Node, to CASE authenticated Nodes 0x1111\_1111\_1111\_1111 and 0x2222\_2222\_2222\_2222.

```

Access Control Cluster: {
  ACL: [
    ...
    3: {
      FabricIndex: 1,
      Privilege: Operate,
      AuthMode: CASE,
      Subjects: [ 0x1111_1111_1111_1111, 0x2222_2222_2222_2222 ],
      Targets: [ { DeviceType: 0x0000_010D } ]
    }
  ]
}

```

A Commissioner adds four more Nodes into an existing fabric. These new Nodes have Node IDs 0x3333\_3333\_3333\_3333, 0x4444\_4444\_4444\_4444, 0x5555\_5555\_5555\_5555 and 0x6666\_6666\_6666\_6666 respectively. The Fabric Administration policy requires associating these four nodes and an existing node (0x2222\_2222\_2222\_2222) into a CAT group.

To achieve this, an Administrator will issue NOCs to all five nodes in this CAT group with a CAT value of 0xABCD\_0001, which is tag identifier value 0xABCD and version 1, and encoded as subject value 0xFFFF\_FFFD\_ABCD\_0001. To distribute these CATs, an Administrator obtains NOCs from its certificate authority with the requisite subjects including the desired CAT. They are either initially provisioned with the **AddNOC** command during initial commissioning (for the new Nodes) or updated with **UpdateNOC** (for existing Nodes).

Then the Administrator grants permissions to the five nodes by updating the ACL of all relevant targets by adding an entry with subject of **CAT** (0xFFFF\_FFFD\_ABCD\_0001). The Administrator may also remove entries where Node 0x2222\_2222\_2222\_2222 appears as an explicit Subject if presentation of the CAT identifier value 0xABCD and version value 0x0001 confers an equivalent privilege. Note that any Node with CAT identifier value of 0xABCD and version value 0x0001 or higher in their NOC will have this privilege.
