

Bit	Code	Feature	Conformance	Summary
2	WBL	Wobble	O	Allows the disco ball to wobble on its axis as speed (dependent on Axis)
3	PAT	Pattern	O	Supports a list of patterns to cycle through automatically
4	STA	Statistics	O	Supports a request to statistics
5	REV	Reverse	P, O	Supports a Reverse command and counterclockwise rotation

Spec Writer Note

Describe features each in a separate section (if needed).

10.4.1.4.1. Statistics Feature

This feature indicates the ability to collect and read out statistics regarding the usage of the Disco Ball.

10.4.1.5. Data Types**10.4.1.5.1. WobbleBitmap Type**

This data type is derived from [map8](#).

Bit	Name	Summary	Conformance
0	Perpendicular	Indicate wobble perpendicular to axis	O
1	AlongAxis	Indicate wobble along Axis	O
2	Around	Indicate wobble around	O

10.4.1.5.2. RotateEnum Type

This data type is derived from [enum8](#).
