

GroupKeySetIDs Field

This field references the set of group keys that generate operational group keys for use with the accessing fabric.

Each entry in GroupKeySetIDs is a [GroupKeySetID](#) field.

11.3. Localization Configuration Cluster

Nodes should be expected to be deployed to any and all regions of the world. These global regions may have differing common languages, units of measurements, and numerical formatting standards. As such, Nodes that visually or audibly convey information need a mechanism by which they can be configured to use a user's preferred language, units, etc.

This cluster supports an interface to a Node. It provides attributes for determining and configuring localization information that a Node SHALL utilize when conveying values to a user.

11.3.1. Revision History

The global ClusterRevision attribute value SHALL be the highest revision number in the table below.

Revision	Description
1	Initial revision

11.3.2. Classification

Hierarchy	Role	Scope	PICS Code
Base	Utility	Node	LCFG

11.3.3. Cluster ID

ID	Name
0x002B	Localization Configuration

11.3.4. Attributes

ID	Name	Type	Constraint	Quality	Fallback	Access	Conformance
0x0000	ActiveLocale	string	max 35	N	MS	RW VM	M
0x0001	SupportedLocales	list[string]	max 32[max 35]	F	MS	R V	M
