

ID	Name	Type	Constraint	Quality	Fallback	Access	Conformance
0x0011	Min-Scaled-Value	int16	max 32766	X		R V	EXT
0x0012	MaxScaled-Value	int16	(Min-Scaled-Value + 1) to 32767	X		R V	EXT
0x0013	ScaledTolerance	uint16	max 2048		0	R V	[EXT]
0x0014	Scale	int8	min -127			R V	EXT

2.4.5.1. MeasuredValue Attribute

This attribute SHALL represent the pressure in kPa as follows:

$\text{MeasuredValue} = 10 \times \text{Pressure [kPa]}$

The null value indicates that the value is not available.

2.4.5.2. MinMeasuredValue Attribute

This attribute SHALL indicate the minimum value of MeasuredValue that can be measured. See [Measured Value](#) for more details.

The null value indicates that the value is not available.

2.4.5.3. MaxMeasuredValue Attribute

This attribute SHALL indicate the maximum value of MeasuredValue that can be measured. See [Measured Value](#) for more details.

The null value indicates that the value is not available.

2.4.5.4. Tolerance Attribute

See [Measured Value](#).

2.4.5.5. ScaledValue Attribute

This attribute SHALL represent the pressure in Pascals as follows:

$\text{ScaledValue} = 10^{\text{Scale}} \times \text{Pressure [Pa]}$

The null value indicates that the value is not available.
