

4.4.4. Features

This cluster SHALL support the FeatureMap bitmap attribute as defined below.

Bit	Code	Feature	Conformance	Summary
0	SPD	MultiSpeed	O	0-SpeedMax Fan Speeds
1	AUT	Auto	O	Automatic mode supported for fan speed
2	RCK	Rocking	O	Rocking movement supported
3	WND	Wind	O	Wind emulation supported
4	STEP	Step	O	Step command supported
5	DIR	AirflowDirection	O	Airflow Direction attribute is supported

4.4.4.1. MultiSpeed Feature

Legacy Fan Control cluster revision 0-1 defined 3 speeds (low, medium and high) plus automatic speed control but left it up to the implementer to decide what was supported. Therefore, it is assumed that legacy client implementations are capable of determining, from the server, the number of speeds supported between 1, 2, or 3, and whether automatic speed control is supported.

The [MultiSpeed](#) feature includes attributes that support a running fan speed value from 0 to SpeedMax.

See [Section 4.4.6.6.1, “Speed Rules”](#) for more details.

4.4.5. Data Types

4.4.5.1. RockBitmap Type

This data type is derived from map8.

Bit	Name	Summary	Conformance
0	RockLeftRight	Indicate rock left to right	M
1	RockUpDown	Indicate rock up and down	M
2	RockRound	Indicate rock around	M
