

**5.3.6.6. CurrentPositionTiltPercent100ths Attribute**

This attribute SHALL indicate the actual position as a percentage with a minimal step of 0.01%. E.g Max 10000 equals 100.00%.

**5.3.6.7. CurrentPositionLiftPercentage Attribute**

This attribute SHALL indicate the actual position as a percentage from 0% to 100% with 1% default step. This attribute is equal to CurrentPositionLiftPercent100ths attribute divided by 100.

**5.3.6.8. CurrentPositionTiltPercentage Attribute**

This attribute SHALL indicate the actual position as a percentage from 0% to 100% with 1% default step. This attribute is equal to CurrentPositionTiltPercent100ths attribute divided by 100.

**5.3.6.9. TargetPositionLiftPercent100ths Attribute**

This attribute SHALL indicate the position where the window covering lift will go or is moving to as a percentage (Unit 0.01%).

**5.3.6.10. TargetPositionTiltPercent100ths Attribute**

This attribute SHALL indicate the position where the window covering tilt will go or is moving to as a percentage (Unit 0.01%).

**5.3.6.11. OperationalStatus Attribute**

This attribute SHALL indicate the currently ongoing operations and applies to all type of devices.

**5.3.6.12. EndProductType Attribute**

This attribute SHOULD provide more detail about the product type than can be determined from the main category indicated by the Type attribute.

If the window covering supports the LF feature and not the TL feature, the following types SHALL be used as the constraint for this attribute:

| Value | Name               |
|-------|--------------------|
| 0     | RollerShade        |
| 1     | RomanShade         |
| 2     | BalloonShade       |
| 3     | WovenWood          |
| 4     | PleatedShade       |
| 5     | CellularShade      |
| 6     | LayeredShade       |
| 7     | LayeredShade2D     |
| 14    | LateralLeftCurtain |
