

6.3.3. Cluster ID

ID	Name
0x050D	Application Basic

6.3.4. Data Types

6.3.4.1. ApplicationStatusEnum Type

This data type is derived from enum8.

Value	Name	Summary	Conformance
0	Stopped	Application is not running.	M
1	ActiveVisibleFocus	Application is running, is visible to the user, and is the active target for input.	M
2	ActiveHidden	Application is running but not visible to the user.	M
3	ActiveVisibleNotFocus	Application is running and visible, but is not the active target for input.	M

6.3.4.2. ApplicationStruct Type

This indicates a global identifier for an Application given a catalog.

ID	Name	Type	Constraint	Quality	Fallback	Access	Conformance
0	CatalogVendorID	uint16	all				M
1	ApplicationID	string	all				M

6.3.4.2.1. CatalogVendorID Field

This field SHALL indicate the Connectivity Standards Alliance issued vendor ID for the catalog. The DIAL registry SHALL use value 0x0000.

It is assumed that Content App Platform providers (see Video Player Architecture section in [\[Matter-DevLib\]](#)) will have their own catalog vendor ID (set to their own Vendor ID) and will assign an ApplicationID to each Content App.
