

Value	Name	Summary	Conformance
2	Terrestrial	The channel is sourced from a terrestrial provider.	M
3	OTT	The channel is sourced from an OTT provider.	M

6.6.5.5. ChannelInfoStruct Type

This indicates a channel in a channel lineup.

While the major and minor numbers in the ChannelInfoStruct support use of ATSC channel format, a lineup MAY use other formats which can map into these numeric values.

ID	Name	Type	Constraint	Quality	Fallback	Access	Conformance
0	Major-Number	uint16	all				M
1	Minor-Number	uint16	all				M
2	Name	string			empty		O
3	CallSign	string			empty		O
4	Affiliate-CallSign	string			empty		O
5	Identifier	string			empty		O
6	Type	Channel-TypeEnum			empty		O

6.6.5.5.1. MajorNumber Field

This field SHALL indicate the channel major number value (for example, using ATSC format). When the channel number is expressed as a string, such as "13.1" or "256", the major number would be 13 or 256, respectively. This field is required but SHALL be set to 0 for channels such as over-the-top channels that are not represented by a major or minor number.

6.6.5.5.2. MinorNumber Field

This field SHALL indicate the channel minor number value (for example, using ATSC format). When the channel number is expressed as a string, such as "13.1" or "256", the minor number would be 1 or 0, respectively. This field is required but SHALL be set to 0 for channels such as over-the-top channels that are not represented by a major or minor number.

6.6.5.5.3. Name Field

This field SHALL indicate the marketing name for the channel, such as "The CW" or "Comedy Central". This field is optional, but SHOULD be provided when known.
