

6.7.7.3.2. Data Field

This field SHALL indicate Optional app-specific data.

6.8. Keypad Input Cluster

This cluster provides an interface for key code based input and control on a device like a Video Player or an endpoint like a Content App. This may include text or action commands such as UP, DOWN, and SELECT.

This cluster would be supported on Video Player devices as well as devices that support remote control input from a keypad or remote. This cluster provides the list of supported keypad inputs and provides a command for sending them.

The cluster server for Keypad Input is implemented by a device that can receive keypad input, such as a Video Player, or an endpoint that can receive keypad input, such as a Content App.

The key codes used are those defined in the HDMI CEC specification (see [HDMI](#)).

Devices MAY understand a subset of these key codes. Feature flags are used to indicate a specific subset that is supported. Device MAY support additional codes beyond what is indicated in feature flags.

6.8.1. Revision History

The global ClusterRevision attribute value SHALL be the highest revision number in the table below.

Revision	Description
1	Initial revision

6.8.2. Classification

Hierarchy	Role	Scope	PICS Code
Base	Application	Endpoint	KEYPADINPUT

6.8.3. Cluster ID

ID	Name
0x0509	Keypad Input

6.8.4. Features

This cluster SHALL support the FeatureMap bitmap attribute as defined below.
