

mand SHALL be as follows:

ID	Name	Type	Constraint	Quality	Fallback	Conformance
0	Status	StatusEnum	all			M

6.8.6.2.1. Status Field

This field SHALL indicate the status of the request.

6.9. Media Input Cluster

This cluster provides an interface for controlling the Input Selector on a media device such as a Video Player.

This cluster would be implemented on TV and other media streaming devices, as well as devices that provide input to or output from such devices.

This cluster provides the list of available inputs and provides commands for selecting and renaming them.

The cluster server for Media Input is implemented by a device that has selectable input, such as a Video Player device.

6.9.1. Revision History

The global ClusterRevision attribute value SHALL be the highest revision number in the table below.

Revision	Description
1	Initial revision

6.9.2. Classification

Hierarchy	Role	Scope	PICS Code
Base	Application	Endpoint	MEDIAINPUT

6.9.3. Cluster ID

ID	Name
0x0507	Media Input

6.9.4. Features

This cluster SHALL support the FeatureMap bitmap attribute as defined below.
