

ID	Name	Direction	Response	Access	Conformance
0x00	GetTariffComponentResponse	client $\leftarrow$ server	N		M
0x01	GetDayEntry	client $\Rightarrow$ server	GetDayEntryResponse	O	M
0x01	GetDayEntryResponse	client $\leftarrow$ server	N		M

9.12.7.1. GetTariffComponent Command

The GetTariffComponent command allows a client to request information for a tariff component identifier that may no longer be available in the [TariffPeriods](#) attributes.

ID	Name	Type	Constraint	Quality	Fallback	Conformance
0	TariffComponentID	uint32	all			M

9.12.7.1.1. TariffComponentID Field

This field SHALL be used to indicate the [TariffComponentID](#) of the [DayEntryStruct](#) to be returned.

9.12.7.1.2. Effect on Receipt

If the [TariffComponentStruct](#) indicated by the [GetTariffComponentTariffComponentID](#) field is no longer available, the server SHALL return a status code of NOT_FOUND.

Otherwise, the server SHALL return information about the [TariffComponentStruct](#).

See [GetTariffComponentResponse](#) for a description of the response command.

9.12.7.2. GetTariffComponentResponse Command

The GetTariffComponentResponse command is sent in response to a GetTariffComponent command.

ID	Name	Type	Constraint	Quality	Fallback	Conformance
0	Label	string	max 128	X		M
1	DayEntryIDs	list[uint32]	1 to 96			M
2	TariffComponent	TariffComponentStruct				M
