

ments. A blank table cell means there is no change to that item and the value from the cluster specification applies.

Cluster ID	Cluster Name	Element	Name	Constraint	Access	Conformance
0x0006	On/Off	Feature	DeadFront-Behavior			M
0x0051	Laundry Washer Mode	Feature	OnOff			X
0x0051	Laundry Washer Mode	Attribute	StartUpMode			X
0x0060	Operational State	Event	OperationCompletion			M

13.2. Refrigerator Device Type

A refrigerator represents a device that contains one or more cabinets that are capable of chilling or freezing food. Examples of consumer products that MAY make use of this device type include refrigerators, freezers, and wine coolers.

13.2.1. Refrigerator Architecture

A Refrigerator is always defined via endpoint composition. See [Section 13.2.6, “Device Type Requirements”](#) for more details.

A Refrigerator MAY include a semantic tag in the TagList attribute of the Descriptor cluster to describe the primary function of the device, e.g., "Refrigerator" or "Freezer".

An example of a Refrigerator with multiple cabinets is illustrated below.
