

Cluster ID	Cluster Name	Client/Server	Conformance
0x0072	Activated Carbon Filter Monitoring	Server	O
0x0202	Fan Control	Server	M

13.10.6. Element Requirements

This lists qualities and conformance that override the cluster specification requirements. A blank table cell means there is no change to that item and the value from the cluster specification applies.

Cluster ID	Cluster Name	Element	Name	Constraint	Access	Conformance
0x0202	Fan Control	Feature	Rocking			X
0x0202	Fan Control	Feature	Wind			X
0x0202	Fan Control	Feature	AirflowDirection			X

13.11. Microwave Oven Device Type

This defines conformance to the Microwave Oven device type.

A Microwave Oven is a device with the primary function of heating foods and beverages using a magnetron.

13.11.1. Microwave Oven Architecture

A Microwave Oven is a device which at a minimum is capable of being started and stopped and of setting a power level.

A Microwave Oven MAY also support additional capabilities via endpoint composition. See the [Device Type Requirements](#) section for typical device types.

The following diagram shows an example Microwave Oven consisting of a parent endpoint that is the Microwave Oven device type and a child endpoint providing additional capabilities.

A microwave oven placed above a thermal oven or cooktop/hob may also include a light for illuminating the cooking surface of the thermal oven or cooktop/hob and an exhaust fan for removing cooking odors.
