

Chapter 17. Common Relative Position Semantic Tag Namespace

This section contains the Common Relative Position semantic tag namespace as part of the semantic tag feature.

The tags contained in this namespace MAY be used in any domain or context, to indicate an association with a position relative to some reference, which must be specified by the user of these tags. For example, the position may be relative to a household item, such as a dining table, and the user of these tags must indicate that. Note the difference with [Chapter 9, Common Position Semantic Tag Namespace](#), which contains tags indicating the position relative to the device.

ID	Namespace
0x12	Common Relative Position

The following tags are defined in this namespace.

ID	Name	Summary
0x00	Under	
0x01	NextTo	Area in proximity to the point of reference
0x02	Around	The area surrounding the point the reference
0x03	On	
0x04	Above	
0x05	FrontOf	
0x06	Behind
