

Chapter 26. Closure Cabinet Semantic Tag Namespace

This section contains the standard semantic tag namespace for closure cabinets as part of the semantic tag feature.

The tags contained in this namespace are restricted for use in the closure domain and SHALL NOT be used in any other domain or context.

ID	Namespace
0x48	Closure Cabinet

The following tags are defined in this namespace.

ID	Name	Summary
0x00	CabinetDoor	A hinged or sliding panel used to cover the opening of a cabinet, providing access to its interior.
0x01	Drawer	A sliding storage compartment, typically built into furniture like cabinets, desks, or dressers.
0x02	Flap	A hinged front or flexible cover that can be lifted or moved, providing access to its interior.
