

3. Reflect all system distribution number to the master by “startDistribution”.

Request (URI)

http://{Device B}/ YamahaExtendedControl/v1/dist/startDistribution?num=1

Response

```
{
  "response_code":0
}
```

9.1.5. Making multi Groups

Here shows how to make multi Groups.

Assume that [MusicCast Network initial setup](#) is already done and MusicCast Network is established as following.

Follow 13.2.1(Making a Group), establish a distribution network with Device B being a master, and with Device A and Device C being clients.

Next is trying to establish a distribution network with Device D being a master, and with Device E being clients.
