

4.11. Secure Channel Protocol	147
4.11.1. Secure Channel Protocol Messages	147
4.11.2. Parameters and Constants	150
4.12. Message Reliability Protocol (MRP)	151
4.12.1. Reliable Messaging Header Fields	151
4.12.2. Reliable transfer	151
4.12.3. Peer Exchange Management	154
4.12.4. Transport Considerations	154
4.12.5. Reliable Message Processing	154
4.12.6. Reliable Message State	159
4.12.7. MRP Messages	159
4.12.8. Parameters and Constants	160
4.13. Unicast Communication	160
4.13.1. Session Parameters	161
4.13.2. Session Establishment Phase	163
4.13.3. Application Data Phase	165
4.14. Session Establishment	166
4.14.1. Passcode-Authenticated Session Establishment (PASE)	166
4.14.2. Certificate Authenticated Session Establishment (CASE)	173
4.15. Secure Communications over TCP	196
4.15.1. Secure Session Establishment	196
4.15.2. TCP Connection Management	197
4.16. Group Communication	198
4.16.1. Groupcast Session Context	198
4.16.2. Sending a group message	199
4.16.3. Receiving a group message	200
4.17. Group Key Management	200
4.17.1. Operational Groups	200
4.17.2. Operational Group Key Derivation	201
4.17.3. Epoch Keys	202
4.17.4. Distribution of Key Material	207
4.18. Message Counter Synchronization Protocol (MCSP)	208
4.18.1. Message Counter Synchronization Methods	209
4.18.2. Group Peer State	210
4.18.3. MCSP Messages	210
4.18.4. Unsynchronized Message Processing	211
4.18.5. Message Counter Synchronization Exchange	212
4.18.6. Message Counter Synchronization Session Context	215
4.18.7. Sequence Diagram	215
4.19. Bluetooth Transport Protocol (BTP)	217
4.19.1. BTP Session Interface	218
