

1.7. Informative References

1.7.1. Connectivity Standards Alliance Reference Documents

Reference	Reference Location/URL	Description
[DotdotArch]	https://groups.csa-iot.org/wg/matter-tsg/document/18649	Dotdot Architecture Model, document 13-0589, revision 14, February 2019
[ZCL]	https://groups.csa-iot.org/wg/members-all/document/23019	Zigbee Cluster Library Specification, document 07-5123, revision 8, December 2019

1.8. Conventions

The following conventions are used in this document.

1.8.1. Enumerations and Reserved Values

An undefined value or range of an enumeration, field, or identifier SHALL be considered reserved for future revisions of this standard and SHALL NOT be available for implementation. It is RECOMMENDED that a value stay undefined, rather than defining it as "reserved".

A value or range of an enumeration, field, or identifier that is available for non-standard implementation SHALL be defined as manufacturer specific ("MS").

A value or range of an enumeration, field, or identifier that is available for other parts of this standard SHALL be defined as such.

A value or range of an enumeration, field, or identifier that is deprecated, and not available for implementation, SHALL be defined as deprecated ("D").

1.8.2. Reserved Bit Fields

An undefined bit or bit field SHALL be considered reserved for future revisions of this standard and SHALL NOT be available for implementation.

It is RECOMMENDED that a bit stay undefined, rather than defining it as "reserved".

An implementation of a revision where a bit is reserved SHALL indicate that bit as zero when conveying that bit in an interaction, and ignore that bit when conveyed from another implementation.

1.8.3. Number Format

In this specification, hexadecimal numbers are prefixed with the designation "0x" and binary numbers are prefixed with the designation "0b". All other numbers are assumed to be decimal unless indicated otherwise within the associated text.

When a hexadecimal number is longer than 4 nibbles, the underscore ("_") character SHALL be used to separate the number into groups of 4 nibbles. If the number of nibbles is not evenly divisi-
