

ID	Name
0x0029	OTA Software Update Provider

11.20.6.4. Data Types

StatusEnum Type

This data type is derived from [enum8](#).

See [Section 11.20.3.2, “Querying the OTA Provider”](#) for the semantics of these values.

Value	Name	Summary	Conformance
0	UpdateAvailable	Indicates that the OTA Provider has an update available.	M
1	Busy	Indicates OTA Provider may have an update, but it is not ready yet.	M
2	NotAvailable	Indicates that there is definitely no update currently available from the OTA Provider.	M
3	DownloadProtocol-NotSupported	Indicates that the requested download protocol is not supported by the OTA Provider.	M

ApplyUpdateActionEnum Type

This data type is derived from [enum8](#).

See [Section 11.20.3.6, “Applying a software update”](#) for the semantics of the values. This enumeration is used in the Action field of the [ApplyUpdateResponse command](#). See ([Action](#)).

Value	Name	Summary	Conformance
0	Proceed	Apply the update.	M
1	AwaitNextAction	Wait at least the given delay time.	M
2	Discontinue	The OTA Provider is conveying a desire to rescind a previously provided Software Image.	M
