

11.23.6.13. CommissioningModeSecondaryStepsInstruction

This field SHALL be populated with the appropriate [Pairing Instruction](#) for those values of CommissioningModeSecondaryStepsHint, for which the [Pairing Hint Table](#) indicates a Pairing Instruction (PI) dependency.

Devices that implement [Extended Discovery](#) SHALL reflect this value in the [Pairing Instruction](#) field of [Commissionable Node Discovery](#) when they have already been commissioned.

11.23.6.14. CommissioningFallbackUrl

This field SHALL identify a vendor-specific commissioning-fallback URL for the device model, which can be used by a Commissioner in case commissioning fails to direct the user to a manufacturer-provided mechanism to provide resolution to commissioning issues. See [Section 5.7.5, “Commissioning Fallback Mechanism”](#) for how this URL is used.

During the lifetime of the product, the specified URL SHOULD resolve to a maintained web page. The syntax of this field SHALL follow the syntax as specified in [RFC 1738](#) and SHALL use the [https](#) scheme. The maximum length of this field is 256 ASCII characters.

11.23.6.15. UserManualUrl

This field (when provided) SHALL identify a product-specific web page containing a user manual for the device model. During the lifetime of the product, the specified URL SHOULD resolve to a maintained web page. The syntax of this field SHALL follow the syntax as specified in [RFC 1738](#) and SHALL use the [https](#) scheme. The maximum length of this field is 256 ASCII characters.

11.23.6.16. SupportUrl

This field (when provided) SHALL identify a product specific support web page. During the lifetime of the product, the specified URL SHOULD resolve to a maintained web page. The syntax of this field SHALL follow the syntax as specified in [RFC 1738](#) and SHALL use the [https](#) scheme. The maximum length of this field is 256 ASCII characters.

11.23.6.17. ProductURL

This field (when provided) SHALL identify a link to a product specific web page. This field SHALL match the [ProductURL](#) field in the [Basic Information Cluster](#) of a device running the software referenced by this DeviceModel record. During the lifetime of the product, the specified URL SHOULD resolve to a maintained web page. The syntax of this field SHALL follow the syntax as specified in [RFC 1738](#) and SHALL use the [https](#) scheme. The maximum length of this field is 256 ASCII characters.

11.23.6.18. LsfUrl

This field (when provided) SHALL identify a link to the Localized String File of this product. This field SHALL NOT have a localized string identifier. During the lifetime of the product, the specified URL SHOULD resolve to a maintained Localized String File. The syntax of this field SHALL follow the syntax as specified in [RFC 1738](#) and SHALL use the [https](#) scheme. The maximum length of this field is 256 ASCII characters.
