

ID	Name	Type	Constraint	Quality	Default	Access	Conformance
0x0A	Endpoint-Bind-ingList	list[DatastoreEndpoint-BindingEntryStruct]				A R	P, M
0x0B	NodeKey-SetList	list[DatastoreNodeKeySetEntryStruct]				A R	P, M
0x0C	NodeA-CLList	list[DatastoreACLEntryStruct]				A R	P, M
0x0D	NodeEnd-pointList	list[DatastoreEndpointEntryStruct]				A R	P, M

11.24.6.1. AnchorRootCA Attribute

This SHALL indicate the Anchor Root CA used to sign all [NOC](#) Issuers in the [Joint Fabric](#) for the accessing fabric. A null value indicates that the [Joint Fabric](#) is not yet formed.

11.24.6.2. AnchorNodeID Attribute

This SHALL indicate the Node identifier of the [Joint Fabric](#) Anchor Root CA for the accessing fabric.

11.24.6.3. AnchorVendorID Attribute

This SHALL indicate the Vendor identifier of the [Joint Fabric](#) Anchor Root CA for the accessing fabric.

11.24.6.4. FriendlyName Attribute

Friendly name for the accessing fabric which can be propagated to nodes.

11.24.6.5. GroupKeySetList Attribute

This SHALL indicate the list of [DatastoreGroupKeySetStruct](#) used in the [Joint Fabric](#) for the accessing fabric.

This attribute SHALL contain at least one entry, the [IPK](#), which has GroupKeySetID of 0.

11.24.6.6. GroupList Attribute

This SHALL indicate the list of groups in the [Joint Fabric](#) for the accessing fabric.
