

- If the [associated fabric](#) for that matching entry, does not equal the [accessing fabric](#):
 - Fail the command with the status code NOT_FOUND, and end processing with no other side effects.
- If the [ReferenceCount](#) of that matching entry is greater than 0:
 - Fail the command with the status code INVALID_IN_STATE, and end processing with no other side effects.
- Remove that entry from the [ProvisionedEndpoints](#) list and store the results.
