

Chapter 6. Media

The Cluster Library is made of individual chapters such as this one. See Document Control in the Cluster Library for a list of all chapters and documents. References between chapters are made using a *X.Y* notation where *X* is the chapter and *Y* is the sub-section within that chapter. References to external documents are contained in Chapter 1 and are made using *[Rn]* notation.

6.1. General Description

6.1.1. Introduction

The clusters specified in this document are for use typically in applications involving media (e.g., Video Players, Content Apps, Speakers), but MAY be used in any application domain.

6.1.2. Cluster List

This section lists the media specific clusters as specified in this chapter.

Table 11. Overview of the Media Clusters

Cluster ID	Cluster Name	Description
0x050E	Account Login	This cluster provides an interface for facilitating user account login on an application or a node.
0x050D	Application Basic	Provides information about a Content App running on a Video Player device which is represented as an endpoint.
0x050C	Application Launcher	This cluster provides an interface for launching content on a Video Player device.
0x050B	Audio Output	This cluster provides an interface for controlling the Output on a Video Player device.
0x0504	Channel	This cluster provides an interface for controlling the current Channel on an endpoint.
0x0510	Content App Observer	This cluster provides an interface for sending targeted messages from a Content App to a Client of that Content App.
