

Seconds of Media Played	Actual Time Taken in Seconds	Direction of playback	PlaybackSpeed
2	2	Forward	1.0
2	1	Forward	2.0
1	2	Forward	0.5
2	2	Reverse	-1.0
2	1	Reverse	-2.0
1	2	Reverse	-0.5

6.10.6.6. SeekRangeStart Attribute

This attribute SHALL indicate the earliest valid position to which a client MAY seek back, in milliseconds from start of the media. A value of NULL SHALL indicate that seeking backwards is not allowed.

6.10.6.7. SeekRangeEnd Attribute

This attribute SHALL indicate the furthest forward valid position to which a client MAY seek forward, in milliseconds from the start of the media. When the media has an associated StartTime, a value of null SHALL indicate that a seek forward is valid only until the current time within the media, using a position computed from the difference between the current time offset and StartTime, in milliseconds from start of the media, truncating fractional milliseconds towards 0. A value of NULL when StartTime is not specified SHALL indicate that seeking forward is not allowed.

6.10.6.8. ActiveAudioTrack Attribute

ActiveTrack refers to the Audio track currently set and being used for the streaming media. A value of null SHALL indicate that no Audio Track corresponding to the current media is currently being played.

6.10.6.9. AvailableAudioTracks Attribute

AvailableAudioTracks refers to the list of Audio tracks available for the current title being played. A value of null SHALL indicate that no Audio Tracks corresponding to the current media are selectable by the client.

6.10.6.10. ActiveTextTrack Attribute

ActiveTrack refers to the Text track currently set and being used for the streaming media. This can be nil. A value of null SHALL indicate that no Text Track corresponding to the current media is currently being displayed.

6.10.6.11. AvailableTextTracks Attribute

AvailableTextTracks refers to the list of Text tracks available for the current title being played. This can be an empty list. A value of null SHALL indicate that no Text Tracks corresponding to the current media are selectable by the client.
