

8.11.5. Data Types

8.11.5.1. ModeOptionStruct Type

The table below lists the changes relative to the Mode Base cluster for the fields of the ModeOptionStruct type. A blank field indicates no change.

ID	Name	Type	Constraint	Quality	Fallback	Access	Conformance
0	Label						M
1	Mode						M
2	ModeTags		1 to 8				M

8.11.6. Attributes

ID	Name	Type	Constraint	Quality	Fallback	Access	Conformance
0x0000	SupportedModes						
0x0001	CurrentMode						
0x0002	StartUpMode						X
0x0003	OnMode						X

8.11.6.1. SupportedModes Attribute

At least one entry in the SupportedModes attribute SHALL include the Bake mode tag in the ModeTags field list.

8.11.7. Derived Cluster Namespace

This namespace includes definitions for data associated exclusively with the derived cluster.

8.11.7.1. Mode Tags

The following table defines the base and derived-cluster-specific ModeTag values.

Mode Tag Value	Name
0x0000	Auto
0x0001	Quick
0x0002	Quiet
0x0003	LowNoise
0x0004	LowEnergy
