

9.12.6.6. CalendarPeriods Attribute

This attribute SHALL indicate the list of [CalendarPeriodStructs](#) comprising this calendar. The [CalendarPeriodStructs](#) in this list SHALL be arranged in increasing order by the value of [StartDate](#).

If and only if the value of the [StartDate](#) attribute is null, the value of the [StartDate](#) field on the first [CalendarPeriodStruct](#) in the [CalendarPeriods](#) attribute SHALL also be null, indicating that the period begins immediately. The value of the [StartDate](#) field on any subsequent [CalendarPeriodStruct](#) in [CalendarPeriods](#) SHALL NOT be null.

The active calendar period SHALL be in effect until the [StartDate](#) of the next calendar period.

If the calendar is unavailable, this attribute SHALL be null.

9.12.6.7. IndividualDays Attribute

This attribute SHALL indicate the list of days to overlay on this calendar.

The [DayStruct](#) in this list SHALL be arranged in increasing order by the value of [Date](#). The [DayStruct](#) in this list SHALL not overlap.

If the calendar is unavailable, this attribute SHALL be null.

9.12.6.8. CurrentDay Attribute

This attribute SHALL indicate the current day's day entries.

If the tariff is not active or CurrentDay information is not available, this attribute SHALL be null.

9.12.6.9. NextDay Attribute

This attribute SHALL indicate the next day's day entries.

If the tariff is not active or NextDay information is not available, this attribute SHALL be null.

9.12.6.10. CurrentDayEntry Attribute

This attribute SHALL indicate the currently active [DayEntryStruct](#).

If the tariff is not active or day entry information is not available, this attribute SHALL be null.

9.12.6.11. CurrentDayEntryDate Attribute

This attribute SHALL indicate the UTC date when the [CurrentDay](#), [CurrentDayEntry](#), and [CurrentTariffComponents](#) attributes were last updated.

If the tariff is not active or day entry information is not available, this attribute SHALL be null.

9.12.6.12. NextDayEntry Attribute

This attribute SHALL indicate the predicted next active [DayEntryStruct](#).
