

- If not present, audio is not being requested.
- If present and null, automatic assignment of a audio stream is requested.
- If present and not null, the specific stream identified by the [AudioStreamIDType](#) is requested.

In a reOffer flow, this field SHALL be set to the existing AudioStreamID stored for this session.

11.5.7.3.7. ICEServers Field

This field SHALL be a list of [ICEServerStruct](#) which contains the ICE servers and their credentials to use for this session. See [ICEServerStruct](#) for further details.

11.5.7.3.8. ICETransportPolicy Field

This field controls the gathering and usage of ICE candidates and SHALL have one of the values found in [ICETransportPolicy](#).

11.5.7.3.9. MetadataEnabled Field

This field indicates if [metadata](#) transmission SHALL be active in this session.

11.5.7.3.10. SFrameConfig Field

This field if present indicates that [SFrame End-to-End Encryption](#) SHALL be active in this session using the configuration provided.

11.5.7.3.11. Effect on Receipt

The process below SHALL be followed by the server when receiving this command:

- If *WebRTCSessionID* is not null and does not match a value in [CurrentSessions](#):
 - Respond with a response status of NOT_FOUND
- If *WebRTCSessionID* is null:
 - If [HardPrivacyModeOn](#) is true:
 - Fail the command with the status code INVALID_IN_STATE, and end processing with no other side effects.
 - If [SoftLivestreamPrivacyModeEnabled](#) is true and *StreamUsage* is [LiveView](#):
 - Fail the command with the status code INVALID_IN_STATE, and end processing with no other side effects.
 - If [SoftRecordingPrivacyModeEnabled](#) is true and *StreamUsage* is [Recording](#) or [Analysis](#):
 - Fail the command with the status code INVALID_IN_STATE, and end processing with no other side effects.
 - If the passed in *StreamUsage* is not found in the [StreamUsagePriorities](#):
 - Fail the command with the status code DYNAMIC_CONSTRAINT_ERROR, and end processing with no other side effects.
 - If *VideoStreamID* is present and is not null and does not match a value in [Allocated-](#)
