

11.7.10.1.1. ConnectionID Field

This field SHALL be a [PushTransportConnectionID](#) representing the push transport which started transmitting.

11.7.10.1.2. TriggerType Field

This field SHALL represent the type of trigger which caused this event to be emitted.

11.7.10.1.3. ActivationReason field

This field SHALL only be present when the TriggerType is Command and provides the reason for the event.

11.7.10.2. PushTransportEnd Event

This event SHALL indicate a push transport transmission has ended.

The data on this event SHALL contain the following information.

ID	Name	Type	Constraint	Quality	Fallback	Conformance
0	ConnectionID	PushTransportConnectionID	0 to 65534			M

11.7.10.2.1. ConnectionID Field

This field SHALL be a [PushTransportConnectionID](#) representing the push transport which stopped transmitting.

11.8. Chime Cluster

This cluster provides facilities to configure and play Chime sounds, such as those used in a doorbell.

11.8.1. Revision History

The global ClusterRevision attribute value SHALL be the highest revision number in the table below.

Revision	Description
1	Initial release

11.8.2. Classification

Hierarchy	Role	Scope	PICS Code
Base	Application	Endpoint	CHIME
