

Cluster ID	Cluster Name	Element	Name	Constraint	Access	Conformance
0x0300	Color Control	Attribute	Remaining-Time			M

4.4. Extended Color Light Device Type

An Extended Color Light is a lighting device that is capable of being switched on or off, the intensity of its light adjusted, and its color adjusted by means of a bound controller device such as a Color Dimmer Switch or Control Bridge. The device supports adjustment of color by means of hue/saturation, enhanced hue, color looping, XY coordinates, and color temperature. In addition, the extended color light is also capable of being switched by means of a bound occupancy sensor.

4.4.1. Revision History

Revision	Description
1	Initial Zigbee 3.0 revision
2	New data model format and notation; integrate DM CCB 3501
3	Added optional occupancy sensing
4	Updated the Scenes cluster to Scenes Management with Cluster ID: 0x0062

4.4.2. Classification

Device Type ID	Device Type Name	Superset Of	Class	Scope
0x010D	Extended Color Light	Color Temperature Light	Simple	Endpoint

4.4.3. Conditions

See the Base Device Type definition for conformance tags.

4.4.4. Cluster Requirements

Each endpoint supporting this device type SHALL include these clusters based on the conformance defined below.

Cluster ID	Cluster Name	Client/Server	Quality	Conformance
0x0003	Identify	Server		M
0x0004	Groups	Server		M
0x0006	On/Off	Server		M
