

Endpoints SHALL support at most one condition.

See the Base Device Type definition for conformance tags.

13.4.4. Cluster Requirements

Each endpoint supporting this device type SHALL include these clusters based on the conformance defined below.

Cluster ID	Cluster Name	Client/Server	Quality	Conformance
0x0056	Temperature Control	Server		M
0x0402	Temperature Measurement	Server		O
0x0052	Refrigerator And Temperature Controlled Cabinet Mode	Server		[Cooler]
0x0049	Oven Mode	Server		[Heater]
0x0048	Oven Cavity Operational State	Server		[Heater]

13.4.5. Element Requirements

The table below lists qualities and conformance that override the cluster specification requirements. A blank table cell means there is no change to that item and the value from the cluster specification applies.

Cluster ID	Cluster Name	Element	Name	Constraint	Access	Conformance
0x0052	Refrigerator And Temperature Controlled Cabinet Mode	Attribute	StartUpMode			X
0x0052	Refrigerator And Temperature Controlled Cabinet Mode	Feature	OnOff			X
0x0049	Oven Mode	Attribute	StartUpMode			X
0x0049	Oven Mode	Feature	OnOff			X
