

Chapter 21. Switches Semantic Tag Namespace

This section contains the standard semantic tag namespace for switches as part of the [semantic tag](#) feature.

The tags contained in this namespace are restricted for use in the switches domain and SHALL NOT be used in any other domain or context. They are intended to indicate the function of a button on a switch device to allow a client to make an optimized user interface which matches the actual device without requiring a-priori knowledge of the layout of each specific switch device.

See the rules for applying these and other tags for switch devices, e.g. from the Common Position Namespace and the Common Number Namespace in the Generic Switch device type section in the Device Library.

ID	Namespace
0x43	Switches

The following tags are defined in this namespace.
